- Standard production time is 10 working days after proof approval.
- Rush service available for 25% of order.

Artwork Guidelines

- Acceptable Computer Disks: 3.5" floppy disks, Iomega 100MB and 250MB ZIP disks and CD-ROMs. All disks should be formatted for Macintosh.*
- We accept artwork in Adobe Illustrator CS, Adobe Photoshop CS, Adobe InDesign CS, Adobe Acrobat 7.0 and QuarkXpress 6.0 or any earlier versions. Your disk must contain all the necessary graphic files and necessary fonts - both printer and screen.
- Each disk must be accompanied by a hard copy proof: a B/W output for 1 color jobs or a color output for jobs of 2 or more colors. Be sure to specify each ink color by Pantone number. The Athletic Line prints to match the Pantone charts. We do not attempt to match ink jet or laser printed colors.
- Full-color files must be CMYK and supplied with a color proof. Please convert all RGB colors and files to CMYK for 4-color process printing.
- If any picture placement, color correction, image assembly or image manipulation is required to complete the artwork on disk, we will notify you for approval of estimated charges before proceeding with the work.
- E-mailing artwork: save your files as an Illustrator EPS with all type converted to path outlines.

**In case of PC platforms, we accept disks prepared in Adobe Illustrator with all fonts outlined.*

Art Department Assistance

If you do not have the facilities to prepare artwork, we can help you. Simply give us a crisp B/W or color replica of the log and a hand-drawn layout to show placement of the copy and design. We will notify you of estimated charges.
